

Carbon emissions factors for Travel

(source: UCLH Carbon Reduction and Sustainability Management Plan, 2010 – derived from estimates of the NHS Carbon Footprint based on research undertaken by the Stockholm Environment Institute)

The number of miles for each transport mode can be calculated for the entire workforce based on average distances commuted, and multiplied by the following emissions factors:

Foot	0.0241
Cycle	0.0184
Tube	0.1
Train	0.05
Bus	0.07
Car Share	0.11
Car	0.21
Motorcycle	0.1
