

ACD Domestic training and exam preparation material 2011

Technical Handbooks 2010 Domestic

<http://www.scotland.gov.uk/Topics/Built-Environment/Building/Building-standards/publications/pubtech/thb2010dom>

Learning objectives:

- 1 Comprehensive understanding of Section 6
- 2 Overview of Sections 1 – 5 within the Technical Handbook.

Procedural Guidance on Certification

<http://www.scotland.gov.uk/Topics/Built-Environment/Building/Building-standards/publications/pubguide/pubproccert>

Learning objectives:

1. Overall understanding on how to use document as reference source.
2. Requirements for a Certificate of Design with a building warrant submission.

Certification Energy Design

<http://www.scotland.gov.uk/Topics/Built-Environment/Building/Building-standards/publications/gl11>

Learning objectives:

- 1 Understanding of how energy design work carried out by suitably qualified and experienced building professionals can be certified as complying with building regulations.

Certification Register

<http://www.scotland.gov.uk/Topics/Built-Environment/Building/Building-standards/certregister>

Learning objectives:

1. Understanding of the purpose of the Certification Register, which is the only source of information on Approved Certifiers and Approved Bodies in Scotland. The Register provides search facilities to help find and contact an Approved Body that offers certification services in a local authority area. The current registration status of known firms can also be checked. Local authority verifiers use the register to check validity of a certificate when submitted to them in support of either a Building Warrant application or a Completion Certificate. The verifier also checks the registration status of the Approved Certifier of Construction when a notice of intent to use certification at completion is received.
