

RBS Sustainable Energy Finance

Helping UK businesses to increase their energy efficiency, reduce energy costs and manage their carbon footprint

Mitigating the risks associated with these issues will save money and help to improve enterprise value

Points to consider...

General

- § How much do you spend on energy per year?
- § How do you buy your energy?
- § What is the composition profile of your total energy expenditure: Gas, Electricity, Coal, Oil, levies etc.?
- § How much energy do you waste?
- § What impact would a rise in energy prices have on your business?
- § How significant an issue do you think this is for *your* customers in their *own* purchasing decision?
- § What will happen if you do nothing?
- § What exactly are you buying?

Property related

- § What is the current energy performance rating of your property?
- § What asset management strategies are in place to meet the requirements of the Energy Act between 2015 and 2018?
- § How much will it cost to be compliant with the legislation - base build or services/controls?
- § How will this expenditure be funded?
